

**CHARGE
WITH CONFIDENCE**

RT15 EV CHARGER KIT

The RT15 EV Charger Kit charges up to 25kW, with full CCS compatibility and connectivity, providing a platform for users to kick-start their own DC charger development.

Coupled with the cloud based IoTecha Intelligent Power Platform (I2P2), the charger can be networked, remotely controlled, monitored and upgraded for future features. An iOS and Android compatible app is available for users to connect to the charger.

THE RECTIFIER

The RT15 is a 450VDC switch mode rectifier with 96% efficiency and is capable of up to 25kW per module. It's high efficiency, high power density and high reliability makes it ideal for applications like fast EV charging.
