# Made to last.

**RT22 50kW Charger Module** is rated for 50kW continuous operation in high-powered electric vehicle chargers.

Available for pre-order

50 - 1000V

> 96%

Reactive  
Power Control

Continuous  
operation

High Power  
Charging

CAN Bus

**Reactive power control** is built-in to maintain stable grid voltage levels without additional network upgrades.

Power is delivered in a compact form-factor due to its high-efficiency (>96%) and well-cooled architecture, ideal for reliable and space-saving chargers.

Scalable in units of 50kW to suit desired charger power classes and easily integrated to a controller via CAN bus.
